Public Information Session – Parrsboro

Proposed West Bay Wind Project:

Harnessing Wind Power for Nova Scotia's Clean Energy Future

ABO Energy is proposing a wind project that will create economic opportunities and clean energy here in Cumberland County. Join us at our upcoming open house event to learn more about our vision – we're eager to hear your feedback!

Date: Tuesday, July 8, 2025

Time: Drop in anytime between 4:00 PM – 7:00 PM

Location: The Hall (Parrsboro Band Hall), 44 King Street, Parrsboro

Refreshments provided

Learn About

- The proposed **West Bay Wind Project** – an 80–130 MW wind energy project that would be sited on private lands, west of Parrsboro
- Project location, timeline, and community/economic benefits
- Environmental studies and regulatory process
- How your input can help shape the project

Speak directly with project team members and share your feedback.

Why It Matters

- Supports Nova Scotia's goal of **80% renewable electricity by 2030**
- Potential to power **~32,000 homes annually**
- Creates local jobs and long-term **economic benefits**
- Commitment to **ongoing community and Indigenous engagement**

Overview

ABO Energy is in the early planning stages of this project, with construction several years away, anticipated to begin in 2028. Now we're focused on local engagement, environmental studies, and technical planning to ensure a viable and responsible project.

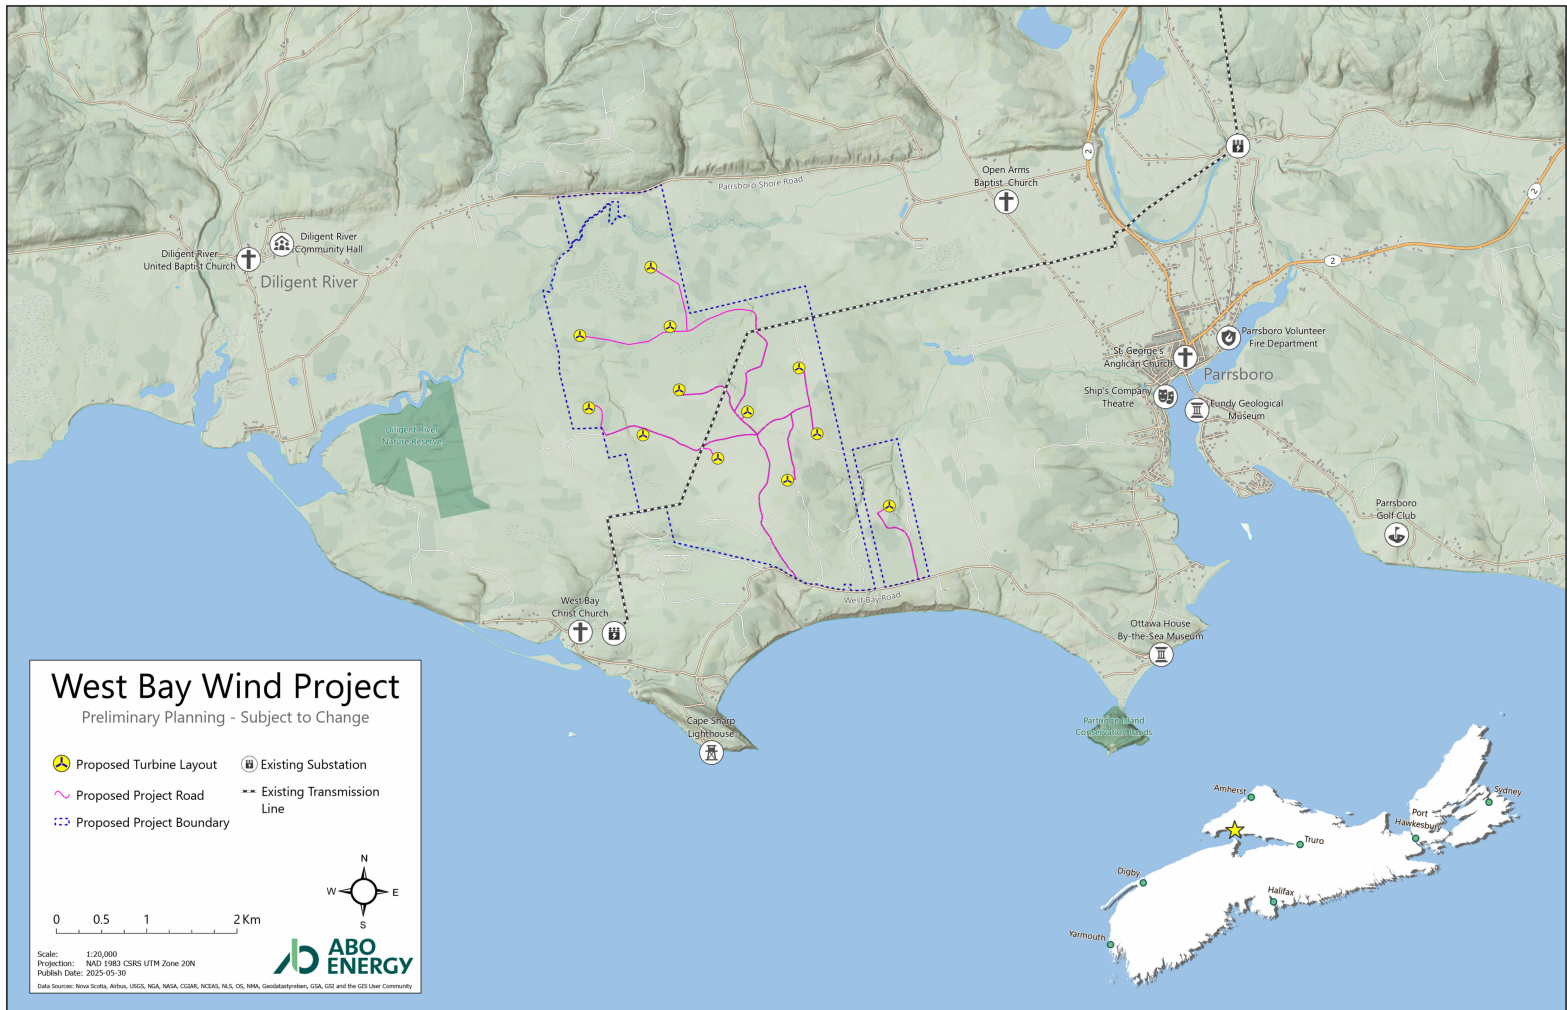

■ We are committed to ongoing dialogue with stakeholders and First Nations throughout the project's life.

■ There will be many opportunities to ask questions, provide input, and participate in the Environmental Assessment process.

■ Join our first information session to learn more, ask questions, and share your feedback. For more information, visit www.westbaywind.com or contact us directly.

Current Site Plan

Various layouts are currently being considered, including the 12-turbine layout proposed below.
